

Just moved in?
Here's Tip #1:
Test your GFCI outlets!

BUILDER TIP

Start good habits early with a home maintenance calendar.

Smoke detectors, caulking checks, HVAC filter changes, etc. A little attention each season keeps your home like new for years.

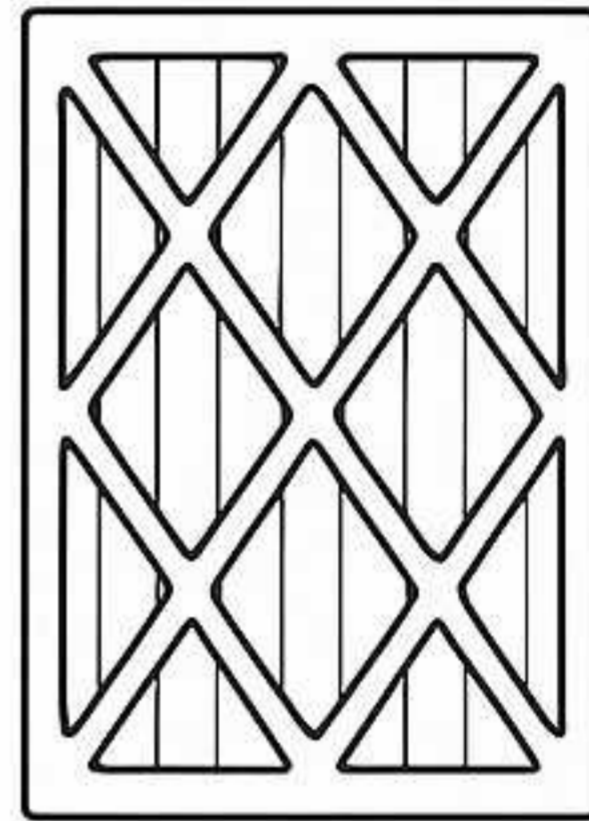

**Best Choice
Builders Inc.**

**Your HVAC is brand new
let's keep it that way.**

**Builder
Tip:**

**Change your
filter every
2-3 months**

BUILDER TIP

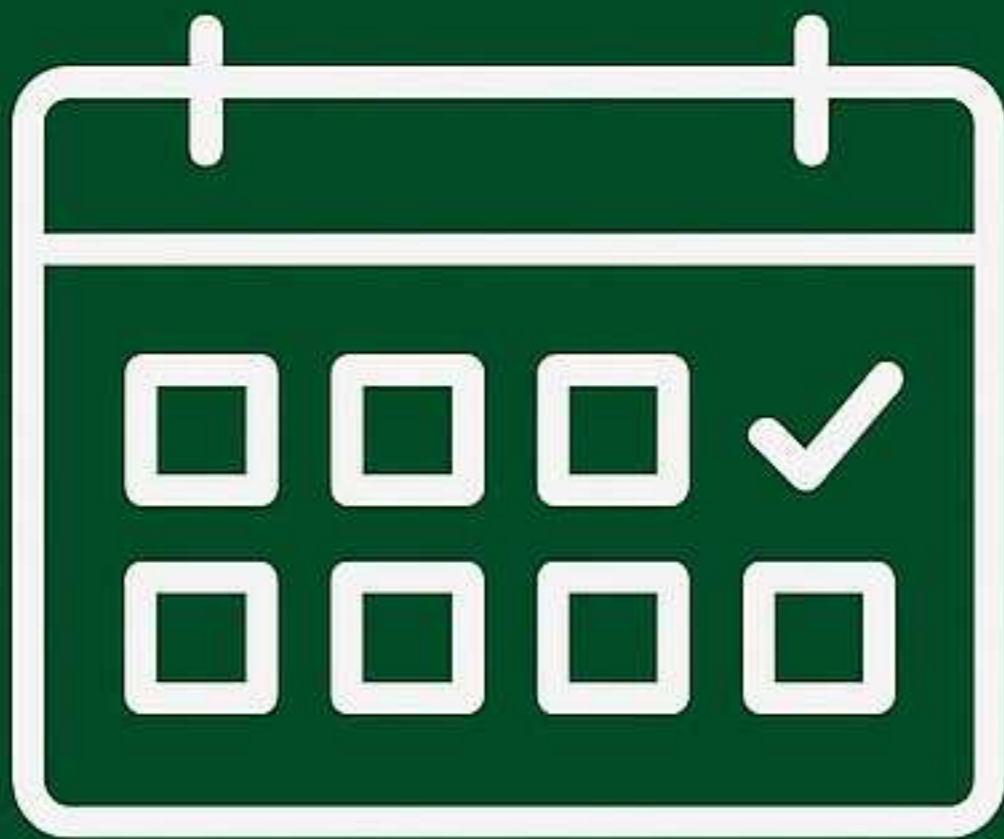

Water your new yard 2–3 times a week in the evening for at least 30 minutes to help your grass grow strong and healthy.

BUILDER TIP #4

Drain your water heater once a year

to remove sediment and extend its life — especially important in hard water areas.

**New doors and windows
will settle a bit —
and that's okay.**

**Builder
Tip:**

If you notice a sticking door or a tiny crack in drywall, it's usually part of the home adjusting. Reach out if you're unsure!
